Summary

I am a Biomedical Engineering professional interested in connecting engineering, healthcare, and technology to improve patient care. My areas of interest include medical devices, biomedical instrumentation, clinical equipment, quality management, regulatory standards, and medical imaging. I aim to develop practical expertise in medical device technology while contributing to safe, reliable, and effective healthcare solutions to apply technical and analytical skills in developing innovative healthcare technologies and improving patient care systems.

Internship

Vadamalayan Multi-speciality Hospital 14 Days Gained exposure to hospital biomedical equipment, maintenance, and troubleshooting.	Madurai
Meenakshi Mission Hospital 1 Week Gained knowledge of equipment installation, testing, maintenance records, and safety protocols.	Madurai
Saravana Multi-speciality Hospital 2 week Gained exposure to ICU/OT equipment and patient monitoring system troubleshooting.	Madurai
KAV Biomedical Equipment 3 days Gained practical knowledge of medical equipment operation, testing, and troubleshooting.	Madurai

Education

Sethu Institute of Technology, B.E. Biomedical Engineering CGPA: 7.893	2023 – 2027 Virudhunagar
SDA Matric Higher Secondary School, HSC 65%	2023 Madurai
SDA Matric Higher Secondary School, SSLC 74%	2021 Madurai

Skills

TECHNICAL SKILLS

Medical Equipment Documentation, Hospital Equipment Safety, Biomedical Instrumentation, Medical Device Risk Management (ISO 14971), Quality Management Systems (ISO 9001), Image Processing, Embedded C, MS Office.

SOFT SKILLS

Communication, Planning, Teamwork, Time Management, Leadership.

Certifications

Harvinn Technologies Recognition Certification in National Wide webinar

International Conference on Sustainable Technologies in Health & Environment certification

I Think Biology course – Elite Grade NPTEL | 2025

Healthcare entrepreneurship course - Elite + Gold NPTEL | 2026

Certification for Best Project in Department of Science & Humanities

Healthcare & Nutrition Certification courses - BE MEDIC Academy

Academic Project

Non-invasive jaundice detection system for adults

Designed a portable, non-invasive hemoglobin detector to measure hemoglobin levels without blood sampling. The device is compact, low-cost, painless, and suitable for quick use in clinics and remote healthcare settings.

Portable bloodless hemoglobin detector

Non-invasive hemoglobin detector to measure hemoglobin levels without blood sampling and suitable for quick use in clinics and remote healthcare settings.
